

TAGteach stands for „Teaching with acoustical guidance“. The training is based on positive reinforcement. Unwanted/wrong behavior is not punished but instead the trainee is guided systematically through the lesson and into success. Individual needs of the trainee are considered and his/her actual abilities respected. Communication is enhanced and learning is speeded up through goal-oriented work with the client.

This seminar focuses on the basics of TAGteach and shall give an overview how to effectively work with dog owners, so that they, as a consequence, can effectively work with their dog

Bina Lunzer is certified CBST (Certificate in Canine Behavior Science and Technology) and certified TAGteacher Level 3 and gives seminars and courses. You find more information on <http://www.happytraining.at/page/bina-lunzer>
