

## Timetable

Thursday, 27<sup>th</sup> September – Animal Welfare Science, Ethics and Law Day

| Ethics                          |                          |   |
|---------------------------------|--------------------------|---|
| 0900-0915                       | Carlos Grau Paricio      | Ethical committees in animal research: law boundaries and beyond  |
| 0915-0930                       | Anne Fawcett             | Consent in companion animal veterinary practice   |
| 0930-0945                       | Kathrin Herrmann         | Animal Experimentation: Working Towards a Paradigm Change   |
| 0945-1000                       | Andrew Gardiner          | Veterinary students' own interests in welfare and ethics  |
| 1000-1015                       | Julie Gaillard           | An ethical analysis of the evolution of zoos in the light of human conception of captivity  |
| 1015-1030                       | Steven McCulloch         | The British animal health and welfare policy process: accounting for the interests of sentient species<br>The case for putting ethics back into policy making: A proposal for a UK Ethics Council for Animal Policy |
| Coffee and Poster Presentations |                          |   |
| 1100-1115                       | Anne Fawcett             | The application of David Fraser's Practical Ethic in veterinary practice  |
| 1115-1130                       | Steven McCulloch         | A proposal for a UK Ethics Council for Animal Policy: The case for putting ethics back into policy making   |
| 1130-1145                       | Valerie Jonckheer-Sheehy | Dog welfare, ethics and evidence based veterinary medicine: special focus on veterinary behavioural medicine  |
| Pain and Emotional State        |                          |   |
| 1145-1200                       | Emanuela Dalla Costa     | Towards a more accurate evaluation of acute pain: does standardised training of assessors improve the inter-observer reliability of the Horse Grimace Scale (HGS)?  |
| 1200-1215                       | Deborah Temple           | Effect of fluralaner on behavioural and stress indicators in laying hens infested with <i>Dermanyssus gallinae</i>  |
| 1215-1230                       | Miriam Marcet Rius       | Tail and ear movements as potential feasible indicators of emotions in pigs   |
| 1230-1245                       | Susanne Waiblinger       | Nociceptive threshold of goat kids undergoing injection of clove oil or isoeugenol for disbudding – a preliminary study   |
| 1245-1300                       | Alice De Boyer De Roches | Behavioural and patho-physiological response as possible signs of pain in dairy cows during <i>Escherichia coli</i> mastitis: A pilot study   |
| 1300-1315                       | Anna Valros              | To disbud but not to dock - is that our answer?   |
| Lunch / AWSELVA OMG             |                          |   |
| Welfare at Slaughter            |                          |   |
| 1500-1515                       | Elein Hernandez          | EEG and Behavioural Changes for on-farm euthanasia of turkeys   |
| 1515-1530                       | Ellie Wigham             | Attitudes of slaughter industry personnel towards animal welfare  |
| 1530-1545                       | Jan Hultgren             | Pre-slaughter cattle handling and stress in mobile slaughter  |
| 1545-1600                       | John Cranley             | Welfare "triage" of broilers to find and counteract suffering   |
| 1600-1615                       | Evangelia Sossidou       | An observational study on tail biting in commercial Greek slaughterhouse  |
| 1615-1630                       | Claire Diederich         | Housing conditions influence perception of auditory communicative signals in horses   |
| Coffee and Poster Presentations |                          |   |
| Domestic/Wild Animal Welfare    |                          |   |
| 1700-1715                       | Solveig Marie Stubsjøen  | Welfare of sheep in traditional and novel housing systems in Norway   |
| 1715-1730                       | Mariana Roccaro          | Survey on management and welfare of Livestock Guardian Dogs in sheep and goat farms in the Tuscany alpine area  |
| 1730-1745                       | Francesca Dai            | Towards an improvement of dairy donkey welfare: the development of good animal management practices guidelines  |
| 1745-1800                       | Maria Cristina Osella    | A program for the feral cat population control in Aoste, Italy  |
| 1800-1815                       | Caroline Gilbert         | Development of an observational quantitative temperament test in parrots  |
| 1815-1830                       | Chantil Sinclair         | From scientific evidence to horse welfare: Understanding barriers and drivers   |
| <b>1900</b>                     |                          | <b>Welcome Reception</b>  |

**ATF Further Education Credits: 7 hours**

Friday, 28<sup>th</sup> September – Joint Behavioural Medicine and Animal Welfare Science, Ethics and Law Day  
Joint programme in the morning and parallel sessions in the afternoon on Behavioural Medicine (BM) and Animal Welfare Science, Ethics and Law (AWSEL)

| <b>Joint Session</b>   |                          |  |   |   |
|--|--------------------------|--|---|---|
| <b>Behavioural Medicine and Animal Welfare Science, Ethics and Law</b> |                          |  |   |   |
| 0900-1000  | Nadja Affenzeller        | Do animals need play and if yes - can owners be a sufficient partner? Implications and consequences for animal welfare   |   |   |
| 1000-1100  | Cathy Dwyer              | Humans, animals and welfare: How do we make positive changes?  |   |   |
| Coffee and posters   |                          |  |   |   |
| 1130-1230  | Nadja Affenzeller        | Insight into human-animal-dyads - current research on who is influencing whom and how this is connected to animal welfare  |   |   |
| 1230-1330  | Cathy Dwyer              | Do animals need their mothers?   |   |   |
| Lunch / ECAWBM AGM   |                          |  |   |   |
| <b>Parallel Sessions</b>   |                          |  |   |   |
| <b>Behavioural Medicine</b>  |                          |  | <b>Animal Welfare Science, Ethics and Law</b> |   |
| 1500-1515  | Nathalie Marlois         | Is an Attention Deficit Hyperactivity Disorder (ADHD) rating scale modified for use in dogs useful for discriminating between a Hypersensitivity-Hyperactivity (HSHA) population and healthy matched controls? | Barbara de Mori                               | Animal-visitor interaction in zoos: an assessment protocol dealing with different educational, ethical and animal welfare aspects |
| 1515-1530  | Patrizia Piotti          | Development of behaviour tests for age-related cognitive decline in family dogs  | Karianne Muri                                 | Qualitative behavioural assessment of sheep is associated with the farmer's intrinsic motivation                                  |
| 1530-1545  | Kendal Shepherd          | How language used to describe dog behaviour may both inform and prejudice perception and accurate interpretation of canine intent  | Luigi Iannetti                                | Welfare assessment with Welfare Quality® protocol and white blood cells evaluation in broiler flocks                              |
| 1545-1600  | Tiago Mendonça           | A novelty test to assess temperament in equine athletes  | Franziska Kuhne                               | Agony breeding - people's perception of breed-related welfare problems in Germany   |
| 1600-1615  | Valerie Jonckheer-Sheehy | Intraspecific horse aggression   | Denise Remy                                   | French veterinary practitioners and animal abuse: a survey  |
| 1615-1630  | Stefanie Riemer          | Firework fears in dogs – links with health, demographics, behaviour problems, and owner training effort  | Valerie Jonckheer-Sheehy                      | Roar! Intraspecific aggression in a captive lion, blending animal welfare, ethics and behavioural medicine                        |
| Coffee and Poster Presentations  |                          |  |   |   |

|           |                |  |                           |  |
|-----------|----------------|--|---------------------------|--|
| 1700-1715 | Gary Landsberg | Anxiolytic effect of dexmedetomidine oromucosal gel (Sileo®) and gabapentin in feline travel anxiety model     | Oriane Talabart           | A critical review of the literature about the link between human and animal abuse                |
| 1715-1730 |                |  | Denise Remy               | Professional confidentiality versus the reporting of abuse in France: legal and ethical analysis |
| 1730-1745 | Joseph Araujo  | Supplementation with a novel lipid extract improves frontal lobe linked cognitive deficits in aged beagle dogs | Manuel Magalhães-Sant'Ana | On Materia Medica and Meridians – EU Vet Regulators and Traditional Chinese Medicine             |
| 1745-1800 |                |  | Ines Windschnurer         | Associations of caretaker attitudes with alpaca behaviour  |
| 1800-1815 | Daniel Mills   | Imepitoin: preclinical and clinical evidence of its potential as an anxiolytic                                 | Julie Gaillard            | A qualitative study of children's attitudes in regard with animal captivity in zoos              |
| 1815-1830 |                |  | Melissa Martin            | A qualitative study of animal welfare inspectors' moral stress in France                         |
| 1830-1930 | ESVCE AGM      |  |                           |  |
| 2000      |                | Social Dinner  |                           |  |

**ATF Further Education Credits: 7 hours**

## Saturday, 29<sup>th</sup> September – Behavioural Medicine Day

|                                 |                          |  |
|---------------------------------|--------------------------|--|
| 0900-0930                       | Isabelle Mougeot         | Development and validation of a canine travel anxiety model  |
| 0930-1000                       | Tiny DeKeuster           | I think my dog is relaxed. Isn't he? Owner awareness regarding their dog's signalling  |
| 1000-1030                       | Machteld van Dierendonck | Objective Pain Assessment in Donkeys – Scale Construction  |
| Coffee and Poster Presentations |                          |  |
| 1100-1115                       | Maya Bräm                | “Sensory Processing Sensitivity”: a dog's personality moderates the influence of owner personality and communication style on the occurrence of behaviour problems                                   |
| 1115-1130                       | Paula Perez Fraga        | Problem solving strategies in family dogs ( <i>Canis familiaris</i> ) diagnosed with separation anxiety-related disorders after a short separation from the owner, in controlled laboratory setting. |
| 1130-1145                       | Stefania Ucheddu         | Effects of “reading to dogs” on reading practice and cognitive abilities in children with pervasive developmental disorder   |
| 1145-1200                       | Ludovica Pierantoni      | Puppy Classes may positively affect the behaviour of adult dogs separated from their litters too early   |
| 1200-1215                       | Kevin McPeake            | Developing a psychometric tool to measure frustration in dogs  |
| 1215-1230                       | Federica Pirrone         | Behavioural and endocrine responses of companion dogs ( <i>Canis familiaris</i> ) to short separation-reunion with the owner in a novel environment  |
| Lunch / GTVMT AGM               |                          |  |
| 1430-1500                       | Anke Görlinger           | Diagnostic performance of individually trained diabetic alert dogs: a blinded prospective observational study  |
| 1500-1530                       | Linda Gerencsér          | Associations between personality traits and disease prevalence in the family dog ( <i>Canis familiaris</i> ); a psychosomatic approach   |
| 1530-1600                       | Nathalie Marlois         | Dog desocialisation during adolescence   |
| Coffee and Poster Presentations |                          |  |
| 1615-1645                       | Gary Landsberg           | The Science of Fear Free: Reviewing the evidence   |
| 1645-1700                       | Valerie Jonckheer-Sheehy | Fear Free Handling; Combatting Interspecific dog aggression in the veterinary clinic   |
| 1700-1715                       | Christel Moons           | A descriptive study of Bengal cat behaviour in Belgium and The Netherlands.  |
| 1715-1730                       | Carlos Grau Paricio      | Introduction to Clinical Ethology in Ferrets   |
| 1730-1745                       | Emmanuelle Titeux        | From feline idiopathic ulcerative dermatitis to feline behavioural self-induced ulcerative dermatitis  |
| 1745-1800                       | Stephane Bleuer-Elsner   | Hyperactivity disorder in the mirror of dog-robot interactions.  |
|                                 |                          |  |

**ATF Further Education Credits: 6 hours**
